EXPERIENCE

PERFECTLY OKAY, FULL STACK DEVELOPER

 July 2023 – Present  Ambernath, Thane

- Spearheaded the enhancement of an existing project using Angular to automate affiliate processes through **web scraping** with Puppeteer in **JavaScript**.
- Pioneered the development of a greenfield project using **Next.js** for end-to-end **full-stack development**.
- Implemented **cron jobs** for automated tasks, ensuring streamlined processes, and crafted an intuitive admin panel for efficient data management.
- Implemented **caching** with next.js to optimize **server-side rendering** speed for productraters.in, leading to **30%** improvement in load times and better overall website performance.

VXXIV CORP, ASSOCIATE CONSULTANT

 Nov 2022 – Jan 2023  Remote, US

- Designed and developed a website for products and services with Wix and **WordPress** website builder.
- Developed efficient web scraping tool, saving 15+ hours per week on data collection, enabling faster decision-making for clients.

 Sept 2022 – Nov 2022 **ASSOCIATE INTERN**

- Research & Website Development, Bugs Fixing, CRM Tools.

PROJECTS

ProShop – Ecomm Mern App

[git-link](#)

- Built an e-commerce store using:
- **express** - Server routes and controllers, **redux** - State management, **axios** - API calls, **JWT** – User authentication and authorization, **mongoose** - CRUD operations for PRODUCT, ORDER, USER. Integrated **payment gateway** using **PayPal API**. Used **MongoDB | Express JS | React JS | Node JS (MERN Stack)** for the development of the system.

Wordle Clone

[git-link](#)

- React based web application, a game to guess a word, player gets 6 chances to guess a word, also get hints each time a guess submitted a word is fetched from a live data hosted with **json-server**, Logic of evaluating result is achieved by **custom-hook**, also with the use of **Hooks (useState, useEffect)**, basic animation with keyframes is applied for input and processing to give a better look and feel.

Technical Expertise

- Well-versed in **ReactJS**, **Next.js**, **AngularJS**, Puppeteer for automation, SSR, caching, **MongoDB** for data management, and **Git/GitHub** for version control, crafting tailored web solutions that meet business *needs* effectively.

SKILLS

- **ReactJS**
- **Next.JS**
- **AngularJS**
- **Web Scraping (Puppeteer)**
- **Caching**
- **SSR**
- **MongoDB**
- **Node JS**
- **Express.js**
- **HTML**
- **CSS**
- **JavaScript**
- **Postman**
- **GIT/GitHub**

EDUCATION

B.E Computer ENGINEERING

BHARAT COLLEGE OF
ENGINEERING

Dec 2019 – May 2022

CGPA: **6.9**

Diploma in Computer Technology

Vivekanand Education

SocietyPolytechnic,

Chembur,

Mumbai August

2016 – June 2019

Result: **69%**

General Skill

- Adaptability
- Critical Thinking
- Team player
